YASHIT ARORA

arorayashit22@gmail.com | LinkedIn | GitHub | LeetCode | Portfolio

PROFILE

Data Science-focused Computer Science undergraduate with hands-on experience building AI-enabled, data-driven, and software applications. Proficient in Python, Java, C, C++, and SQL, with project experience applying machine learning, NLP, OCR, time-series analysis, and dashboards to compliance and operational problems. Strong analytical, problem-solving, and collaboration skills.

EXPERIENCE

Intern **Summer 2026**
NES Technology *Hybrid*

- Analyzed smart-meter data with Python and improved short-term load-forecasting MAPE to **6.23%** from an 11.84% baseline using lag, rolling-window, and weather features.
- Developed an energy-theft and anomaly-detection workflow using suspicion scoring, event-duration analysis, and co-occurrence analysis on DLMS/COSEM OBIS-coded event logs.
- Designed leak-free validation and adaptive holdout logic for short time-series datasets, converting forecasting and anomaly results into reliable operational insights.

PROJECTS

CompliScan – AI-Powered Legal Metrology Compliance Platform *OCR | PaddleOCR | Computer Vision | Web Development*

- Built an end-to-end compliance platform integrating OCR, computer vision, and rule-based validation to automate analysis of packaged-product declarations.
- Implemented extraction and validation of **MRP, net quantity, business details, dates, consumer information, and country of origin** with confidence-aware PASS/REVIEW/FAIL outcomes.
- Designed human-review workflows with scan history, evidence review, and visual verification to support field-based product compliance inspections.

MeterIQ – Smart Meter Monitoring & Investigation Platform *Python | Pandas | NumPy | Scikit-learn | Time-Series | Dashboard*

- Developed a data-analytics platform for monitoring **energy consumption, load forecasts, and potential anomalous behavior** across electricity-distribution operations.
- Built an interactive dashboard presenting **meter-level trends, AI-generated forecasting insights, anomaly flags, and historical records** for operational review.
- Integrated analytics into an investigation workflow that enables supervisors to review flagged meters and assign cases for manual field verification.

EmotionSense – NLP Emotion Classification Application *Python | Scikit-learn | NLTK | Streamlit*

- Developed and evaluated an NLP application that classifies text into **six emotion categories** using TF-IDF/Bag-of-Words features and machine-learning models.
- Achieved **86.38% accuracy and 0.8144 macro F1** with Logistic Regression and deployed the analysis workflow through a multi-page Streamlit application.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C, C++, SQL, JavaScript, HTML, CSS
- **AI, ML & Data:** Scikit-learn, Pandas, NumPy, Machine Learning, Generative AI Fundamentals, NLP, OCR, Computer Vision, Anomaly Detection, Time-Series Forecasting
- **Development Tools:** Git, GitHub, REST APIs, Streamlit | **Familiar With:** React.js, Node.js, Express.js
- **Databases:** MySQL, SQL, Database Design, CRUD Operations
- **Core CS:** DSA, OOP, DBMS, Operating Systems, Computer Networks | **LeetCode:** 132+ solved (124 C++, 8 MySQL)

EDUCATION

Thapar Institute of Engineering & Technology **2024–2028**
B.Tech – Computer Science & Engineering
Relevant Coursework: Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks, Artificial Intelligence, Machine Learning

DAV Public School **85%**
CBSE Class XII New Delhi, India

POSITIONS OF RESPONSIBILITY

Management Head – Backslash Computing Society, Thapar Institute of Engineering & Technology | **Performance Head** – Mudra Cultural Society | **Vice-Captain** – College Cricket Team

ACHIEVEMENTS

Winner – Inter-College Cricket Tournament | Winner – College Cricket Series | 1st Place – College Dance Competition

CERTIFICATIONS

Career Essentials in Generative AI – Microsoft & LinkedIn Learning | Deloitte Data Analytics Job Simulation – Forage
